...in the dining room

SINGLE-TONE WALLS (left)

Like the traditional look? Paint cabinets and walls the same beige color. The simple backdrop provides a stunning space for beachy accessories, like faux conch shells and coral, to shine.

BAMBOO FURNITURE

(below, left) Introduce subtle hits of coastal fun with an iconic island wood—like this informal bamboo table.

FAUX-BOIS WALLPAPER

(below, right) Enliven plain-Jane drywall with a textural wallcovering that replicates natural wood. Its vertical lines create the illusion of height in small spaces.

LOW SEATING (opposite)

For dining rooms with a view, choose backless benches and low-back chairs to keep the emphasis on the beautiful outdoor surroundings.
