STAPRANS DESIGN

FAVORITE BOOK

The book I'm thinking about most these days is the one I'm writing: *The Soul of Design*. Featuring art, interior design, architecture, gardens, and other soulful spaces around the world, it explores transcendental environments where we feel something bigger than ourselves. I hope it will help us look differently—and more deeply—at what surrounds us and how spaces affect us.

MOST INFLUENTIAL PHILOSOPHERS

I am inspired most by the Dalai Lama ("Experiencing beauty brings pleasure, a sense of well-being, and happiness"), Mahatma Gandhi ("Determination and faith can alter the course of history") and Siddhartha Buddha ("What we do makes a difference"). These great thinkers teach us that we can be intentional about great design and that it makes a profound difference in our lives.

About Staprans Design

Exemplary interior design flows from two opposing, yet complementary elements: the aesthetic and the technical. With Lisa Staprans' design expertise* and passion for design and Armin Staprans' skills in architecture** design and construction, we blend these essential qualities in our concierge design firm, which offers complete interior design, interior architecture, and construction services. Our approach is to work from your vision, not our own agenda; and our passion is bringing beauty and integrity to your living environment. Whether you are looking for someone to design and/or build your new home or remodel, be a part of your team with your architect or contractor, or simply need help finding one extraordinary piece of furniture or accessory, come and visit us.
