

## RINFRET, LTD.

**W**hen pressed to pick a favorite feature, designer Cindy Rinfret and the clients all agree that the knockout two-tone herringbone wood floor is the star of this den. As the first room visitors see when they enter, the den sets the stage for the rest of the home, with the lighter floor tone echoed in other rooms. At once a quiet sitting room and a hangout spot for evening cocktails by the fire, this multipurpose spot comes alive, thanks to rich wood finishes and vibrant colors, with handsome, clean-lined pieces nodding to midcentury modern style. A bold, undulating yellow sofa and blue high-backed swivel chairs offer plenty of seating, and new built-in bookshelves feel light and elegant in a high-gloss paint. The light fixture's sculptural form draws the eye to the ceiling and is emblematic of the eclectic design infused throughout the rest of the home. —NT

**WINNERS** athome magazine's **A-List Online People's Pick 2018 contest**

For our first-ever **People's Pick**, to “like” a project was to love it. This online contest put the judging in the public’s hands, and by “liking” the projects they loved the most, friends, family, clients and colleagues determined the winner in each category. Take a look at which projects were crowned the fan favorites!
