*Award for Excellence in Sustainable  
 Design - Canada*

## Atelier Cachet

Atelier Cachet is an award-winning, multi-disciplinary design firm that builds modern, luxe estate and designs couture interiors. Founded in 2004 by husband and wife team Nathalie Tremblay and Dave Nicholas, the company's edgy, sleek aesthetic and its use of simple forms and a balanced mix of materials during the design process have earned its reputation as a leader in the custom contemporary design/build category.

We provide a full interior design and build service for new builds, renovation projects and custom interiors. We also offer a turnkey solution from start to finish and have a team of reputable and experienced trades people.

Our clients are individuals that have a good sense of what they want; they want to work with us because they love my brand and want to bring their project to the next level by pushing the boundaries and exceeding everyone's expectations. Our clients are professionals that understand the value of hiring a designer to complete their project.

In terms of our philosophy to achieve exceptional results we create an interior design solution that works best for our client. Atelier Cachet believes that every project has its own unique set of challenges and solutions, worthy of a creative cutting edge contemporary design. We approach each project with a fresh vision, focused passion and a commitment to outstanding service.

Working in an industry which is constantly evolving is tough so to ensure we are keeping up to speed with any emerging trends we regularly attend design, fashion, car and trade shows to be aware of new ideas to set our own trends. We have a constant desire to grow and learn. We always explore and develop new ideas. We are adventurous, creative and open-minded. Change is something we always look to embrace.

Our mission is to inspire and enrich our client's lives by creating a comfortable environment with a unique character. We aim

by achieving beauty through function and enhancing the client's quality of life. Our greatest reward is the satisfaction of our clients.

In terms of the company's ethos we look to build strong relationships and create clients for life. We always find a team with a positive attitude creates a fun and enjoyable working environment.

Operating in Toronto presents several opportunities and challenges but arguably the greatest thing about the city we live in is its multi-cultural diversity. The diversity of race, language, religion and lifestyle helps define and set Toronto apart from other world cities.

To be given the 'Award for Excellence in Sustainable Design - Canada' was an honour, we are thrilled to have received this prestigious award. Dedication to environmental responsibility is fundamental to Atelier Cachet's philosophy. We as a company are always trying to reduce the environmental and carbon impact on every job. A renovation tends to create a lot of garbage and debris; therefore if possible, we try to recycle items like old millwork and doors.

In terms of our future prospects, we are quite optimistic about what lies ahead. We are passionate about interior design and modern architecture and how it can greatly change and impact your lifestyle. We have to keep striving for innovative and cutting-edge design concepts by offering the ultimate luxurious homes and lifestyles.

to create timeless interior and architecture
